

National Institute on Aging
Bethesda, MD, United States

June 24, 2024

To whom it may concern,

I am inquiring about the currently available Senior Data Scientist position posted on

I currently am an Analyst/Algorithm Developer at Toyon Research Corporation in Goleta. My previous experience strongly relates to the work National Institute on Aging is doing. I am the lead developer on a research platform for embedded GPS denied indoor/outdoor navigation. In addition to my current role, I previously led development efforts for UAV mission planning, routing, and control. In support of these applications, I perform extensive image and signal processing work in C++, Python, and Matlab, as well as build and maintain high reliability web and desktop GUI applications and infrastructure.

Constantly learning and pushing my technical knowledge and abilities is important to me, and working with the National Institute on Aging team would allow me to do just that. The combination of my current skills and my desire and ability to quickly learn new skills will allow me to become a valuable asset to your team while

I look forward to discussing this opportunity further and can be reached by email at loman.daniel@gmail.com.

Sincerely,

Tayler Blake
